

Avi Balsingh

33 Skipperhill Cres. | Toronto, ON M1X 1W1 | 647-779-7110 | avi.balsingh@gmail.com

Professional Summary

Experienced and versatile Technical Specialist and Operations Lead with over 10 years of experience in enterprise systems support, infrastructure migration, digital collaboration, and high-stakes live technical environments. Proven track record in transitioning organizations to cloud ecosystems, managing complex technical documentation, and directing real-time technical workflows under operational pressure. Expert in bridging the gap between sophisticated technical systems and end-user adoption through training, Standard Operating Procedures (SOP), and process optimization.

Technical Skills

- **Enterprise Systems:** Microsoft 365 Administration (SharePoint, Teams, Exchange), VMware, Cisco Networking.
- **Information Management:** Database Management (MySQL, MongoDB), Asset Tracking, Technical Documentation, SOP Development.
- **Development & Automation:** JavaScript, Node.js, Express, HTML/CSS, Bootstrap.
- **Live Operations & Broadcasting:** Signal Matrix Routing, Pixel/Projector Mapping, Streaming/Broadcast Setup, vMix Operations, Audio/Video Engineering.
- **Soft Skills:** Stakeholder Training, Change Management, First Person Resolution, Cross-functional Collaboration, Team Management.

Professional Experience

Spntrx Productions | Owner & Managing Director | Toronto, ON

April 2024 – Present (*Freelance Sprints: Sept 2025 – Feb 2026 | April 2026 – Present*)

- Manage end-to-end AV production, digital infrastructure, and equipment logistics for corporate conferences, large-scale events, and live broadcasts.
- Deliver multi-role technical execution across large-scale productions, serving as Lead Video Operator (V1/V2), Audio Operator (A1/A2), and Streaming/Broadcast Technician.
- Configure, program, and manage real-time event software platforms including vMix, pixel mapping, projector mapping, and record monitor technical setups.
- Oversee on-site technical teams, managing rigger crews, lighting assistants, LED wall technicians, and breakout room operations under tight live-event constraints.
- Set up and operate all specialized audio, recording, and distribution equipment for major international summits, including the International Conference on Medical and Health Science.

Space Explorers The Infinite | VR Tech Lead (BOH) | Toronto, ON

March 2026 – April 2026

- Oversee comprehensive technical operations, localized network configurations, and system stability for free-roaming virtual reality installation scenery.
- Troubleshoot complex virtual reality hardware, HMDs, and software synchronization tracking errors in real time under high operational pressure.
- Supervise and coordinate back-of-the-house Mission Specialists, streamlining onboarding, UV sanitation, and guardian station workflows to ensure optimal team performance.
- Provide continuous technical training to floor staff, execute equipment maintenance tasks, and author daily operational and technical logs for senior management.
- Maintain an exceptionally safe, clean, and highly professional environment throughout the duration of the high-traffic public exhibition.

Illuminarium & Secret Location | Experiential Engineer | Toronto, ON

Dec 2023 – September 2025

- Led technical execution and system stability for high-stakes immersive environments, managing complex network infrastructure and backend systems.
- Developed and maintained comprehensive technical documentation and Standard Operating Procedures (SOPs) to ensure consistent quality and operational continuity.
- Collaborated on R&D projects, providing critical feedback during testing phases to optimize system responsiveness and user interaction.
- Re-engineered the production and staging architecture to deliver high immersive shows and high-profile client events.
- Created and developed customized, client-sponsored events and corporate conferences for major entertainment brands including Marvel, Netflix, and Sony Pictures.
- Partnered closely with Sales and Marketing teams to provide strategic guidance on integrating information systems with current technologies while identifying future enhancements.
- Worked with divisional teams in the USA to document and map key business processes, identifying opportunities for optimization and efficiency.
- Implemented scalable technical frameworks that supported rapid show turnover, touring content, and frequent client-driven reconfigurations without compromising system reliability.

Paradigm | Technical Support Engineer | Mississauga, ON

May 2022 – June 2023

- Resolved complex technical issues by implementing solutions strictly aligned with corporate policy and governance standards.
- Facilitated advanced training sessions for corporate clients and regional installers on hardware configuration, software updates, and system programming.

Newcom Media | Desktop Support Engineer | Etobicoke, ON

June 2021 – June 2022

- Directed the migration of company infrastructure from local servers to cloud-based Microsoft 365 systems, ensuring data integrity and seamless user transition.
- Administered Microsoft 365 user accounts, allocated network storage, and managed secure equipment asset tracking.
- Delivered staff training on audiovisual tools and Microsoft applications to improve organizational digital literacy.
- Provided Tier 1 and 2 support for network hardware and mobile devices across multiple office locations.

Best Buy, Geek Squad | Counter Intelligence Agent | Markham, ON

May 2019 – June 2021

- Performed hardware and software diagnostics and repairs, maintaining high standards for customer service and technical accuracy.

Education & Certifications

- **Full Stack Development Certificate** | University of Toronto SCS
- **Dante Certification Level 2** | Audinate
- **Q-Sys Level 2 Certification** | QSC
